

EurosignDS Trigger Management Suite is a software application which facilitates remote triggering of player content. The application can be installed on a user's client PC or a EurosignDS player, depending on requirements.

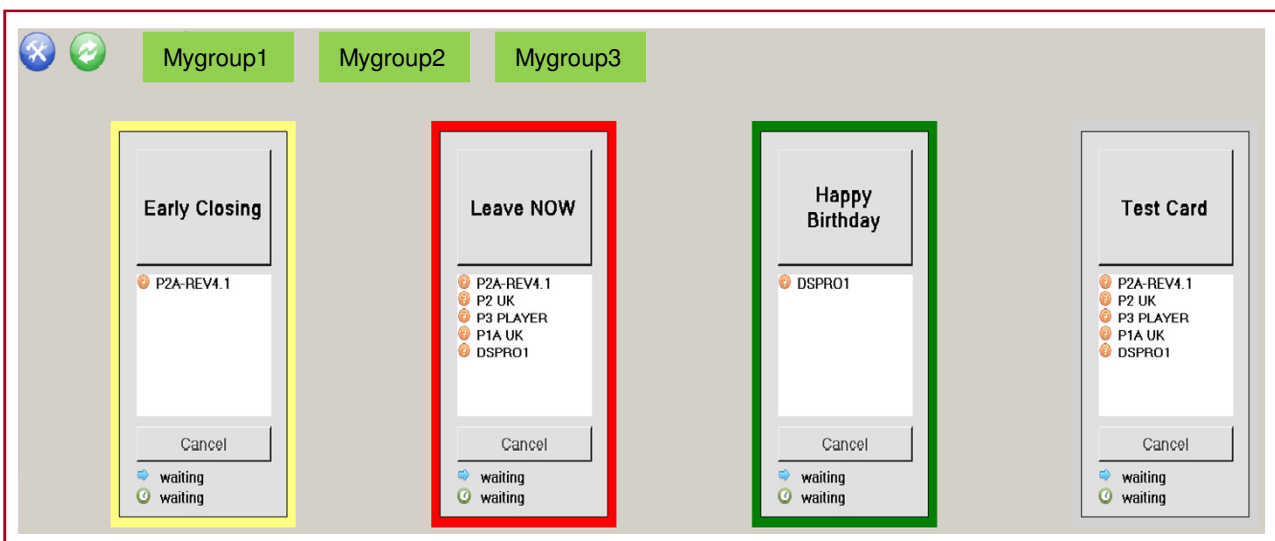

- Create trigger events
- Associate players and content with trigger events
- Manage multiple triggers and players
- Arrange and colour code triggers in page groups
- Automatic Triggers from external systems (I/O option)

Trigger I/O option

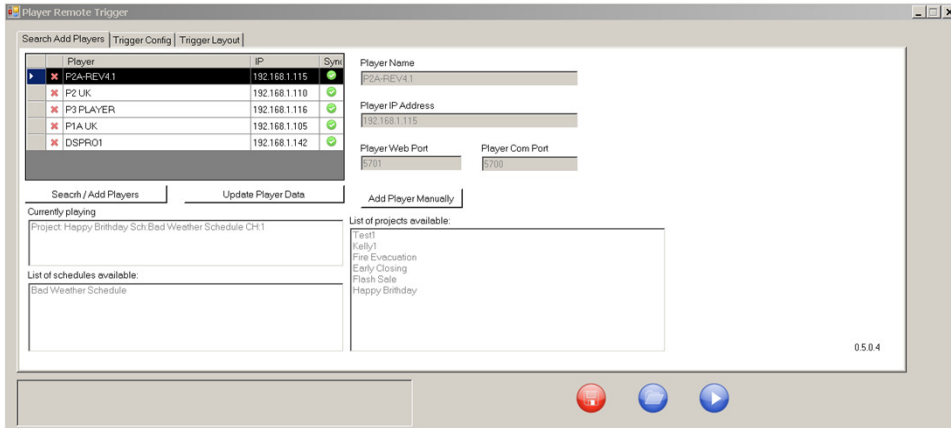

Applications

- Touch screen event control (via software panel)
- Sensor controlled content – e.g. museums
- Fire Alarm controlled evacuation messages
- Emergency drill messages
- Local content override from switch panel (eg “50% off at bakery”)

Captivate your audience - Promote, Inform and Entertain
